## Список литературы

[1] SEGOVIA-JUAREZ, J. L. et al., Mutation buffering capabilities of the hypernetwork model, in *The Third NASA/DoD workshop on Evolvable Hardware*, edited by KEYMEULEN, D. et al., pages 7–13, Long Beach, California, 2001, Jet Propulsion Laboratory, California Institute of Technology, IEEE Computer Society.

[2] PFAFFMANN, J. O. et al., Scouting context-sensitive components, in *The Third NASA/DoD workshop on Evolvable Hardware*, edited by KEYMEULEN, D. et al., pages 14–20, Long Beach, California, 2001, Jet Propulsion Laboratory, California Institute of Technology, IEEE Computer Society.

[3] DOLIN, B. et al., Methods for evolving robust distributed robot control software: coevolutionary and single population techniques, in *The Third NASA/DoD workshop on Evolvable Hardware*, edited by KEYMEULEN, D. et al., pages 21–29, Long Beach, California, 2001, Jet Propulsion Laboratory, California Institute of Technology, IEEE Computer Society.

[4] STOICA, A. et al., Progress and challenges in building evolvable devices, in *The Third NASA/DoD workshop on Evolvable Hardware*, edited by KEYMEULEN, D. et al., pages 33–35, Long Beach, California, 2001, Jet Propulsion Laboratory, California Institute of Technology, IEEE Computer Society.

[5] SANTINI, C. C. et al., Pama-programmable analog multiplexter array, in *The Third NASA/DoD workshop on Evolvable Hardware*, edited by KEYMEULEN, D. et al., pages 36–43, Long Beach, California, 2001, Jet Propulsion Laboratory, California Institute of Technology, IEEE Computer Society.

[6] SINOHARA, H. T. et al., Repair of analog circuits: Extrinsic and instrinsic evolutionary techniques, in *The Third NASA/DoD workshop on Evolvable Hardware*, edited by KEYMEULEN, D. et al., pages 44–47, Long Beach, California, 2001, Jet Propulsion Laboratory, California Institute of Technology, IEEE Computer Society.

[7] GALLAGHER, J. C., A neuromorphic paradigm for extrinsically evolved hybrid analog/digital device controllers: Initial explorations, in *The Third NASA/DoD workshop on Evolvable Hardware*, edited by KEYMEULEN, D. et al., pages 48–55, Long Beach, California, 2001, Jet Propulsion Laboratory, California Institute of Technology, IEEE Computer Society.

[8] SALEH, J. H. et al., Extracting the essence of flexibility in system design, in *The Third NASA/DoD workshop on Evolvable Hardware*, edited by KEYMEULEN, D. et al., pages 59–72, Long Beach, California, 2001, Jet Propulsion Laboratory, California Institute of Technology, IEEE Computer Society.

[9] ABRAMOVICI, M. et al., Roving stars: An integrated approach to on-line testing, diagnosis,and fault tolerance for fpgas in adaptive computing systems, in *The Third NASA/DoD workshop on Evolvable Hardware*, edited by KEYMEULEN, D. et al., pages 73–92, Long Beach, California, 2001, Jet Propulsion Laboratory, California Institute of Technology, IEEE Computer Society.

[10] TYRRELL, A. M. et al., Evolutionary strategies and intrinsic fault tolerance, in *The Third NASA/DoD workshop on Evolvable Hardware*, edited by KEYMEULEN, D. et al., pages 98–106, Long Beach, California, 2001, Jet Propulsion Laboratory, California Institute of Technology, IEEE Computer Society.

[11] HADDOW, P. C. et al., Bridging the genotype-phenotype mapping for digital fpgas, in *The Third NASA/DoD workshop on Evolvable Hardware*, edited by KEYMEULEN, D. et al., pages 109–115, Long Beach, California, 2001, Jet Propulsion Laboratory, California Institute of Technology, IEEE Computer Society.

[12] MILLER, J. F. et al., Evolving messy gates for fault tolerance: Some preliminary findings, in *The Third NASA/DoD workshop on Evolvable Hardware*, edited by KEYMEULEN, D. et al., pages 116–123, Long Beach, California, 2001, Jet Propulsion Laboratory, California Institute of Technology, IEEE Computer Society.

[13] HOUNSELL, B. I. et al., Evolutionary design and adaption of digital filters within an embedded fault, in *The Third NASA/DoD workshop on Evolvable Hardware*, edited by KEYMEULEN, D. et al., pages 127–135, Long Beach, California, 2001, Jet Propulsion Laboratory, California Institute of Technology, IEEE Computer Society.

[14] HOUNSELL, B. I. et al., Evolutionary design and adaption of digital filters within an embedded fault, in *The Third NASA/DoD workshop on Evolvable Hardware*, edited by KEYMEULEN, D. et al., pages 127–135, Long Beach, California, 2001, Jet Propulsion Laboratory, California Institute of Technology, IEEE Computer Society.

[15] SCHINER, T. et al., Digital filter design using multiple pareto fronts, in *The Third NASA/DoD workshop on Evolvable Hardware*, edited by KEYMEULEN, D. et al., pages 136–145, Long Beach, California, 2001, Jet Propulsion Laboratory, California Institute of Technology, IEEE Computer Society.

[16] CASTILLO, O. et al., Application of a breeder genetic algorithm for system identification in an adaptive finite impulse response filter, in *The Third NASA/DoD workshop on Evolvable Hardware*, edited by KEYMEULEN, D. et al., pages 146–153, Long Beach, California, 2001, Jet Propulsion Laboratory, California Institute of Technology, IEEE Computer Society.

[17] Moreno Arostegui, J. M. et al., An in-system routing strategy for evolvable hardware programmable platforms, in *The Third NASA/DoD workshop on Evolvable Hardware*, edited by KEYMEULEN, D. et al., pages 157–166, Long Beach, California, 2001, Jet Propulsion Laboratory, California Institute of Technology, IEEE Computer Society.
