 and Justinian Rosca  
 evolutionary computation Computation  
 Computation  
 Computation  
 Computation  
 representations of neural networks Computation  
 computation: Reporting and research practices Computation  
 techniques and multidimensional visualization  
 multiobjective genetic algorithm performance  
 different difficulty  
 to polymer extrusion  
 theory  
 evolutionary theory and the incident edge model  
 optimization problems  
 networks  
 hardware, and simulation  
 on data mining with evolutionary algorithms: Research directions Algorithms: Research Directions  
 systems  
 in forced two-choice decision tasks  
 in learning classifier systems  
 detrimental classifiers  
 simplification of ANN training with genetic algorithm  
 telecommunication network  
 hardware using genetic algorithms  
 landscapes  
 crossover operator based on adjacency relations  
 genetic algorithms  
 response  
 mathematical modeling of chemical processes in medicine  
 a GA-fuzzy approach  
 optimization
